

GAYATRI DEVI P

Senior .NET Full Stack Developer | ASP.NET Core | Angular | AWS | Microservices

Singapore | Phone No: +65 88957511

Email Id: gayatridevi.palla@gmail.com

LinkedIn: www.linkedin.com/in/gayatri-devi-p

PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with over **7+ years of experience** designing, developing, and delivering enterprise-scale applications across **Payments, Financial Services, Insurance, Identity & Access Management (IAM), and Singapore Government sectors**.

Expertise in **C#, ASP.NET Core, Angular, Microservices, SQL Server, and AWS Cloud** with a strong track record of building secure, scalable, cloud-native applications. Experienced in payment gateway integrations, authentication platforms, distributed systems, API development, cloud modernization, and end-to-end software delivery in Agile environments.

Proficient in designing high-availability solutions, implementing event-driven architectures, and collaborating with cross-functional teams to deliver mission-critical business applications.

CORE COMPETENCIES

Technologies: C#, ASP.NET Core, .NET Core, Entity Framework, Angular, TypeScript, JavaScript, REST APIs, Microservices, RabbitMQ, WCF, SOAP Services, HTML5, CSS3.

Cloud & DevOps: AWS Lambda, EC2, AWS ECS/EKS, RDS, API Gateway, Docker, Kubernetes, SNS/SQS, Cloud Watch, CI/CD, IAM, AWS Secret Manger, AWS ECR, Code Commit.

Databases & Testing Tools: SQL Server, MySQL, Git, Swagger, Postman, NSwag Studio, Visual Studio, VS Code, xUnit, Moq.

Domain Knowledge: Payments, Financial Services, Government Systems, Identity & Access Management, Insurance.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions (CTS), Singapore

Senior .NET Full Stack Developer

2022 – Present

Client: Singapore Land Authority (SLA)

Project: Common Payment System (CPS)

2025 – Present

Centralized payment platform supporting digital payment transactions across Singapore government services through PayNow, GIRO, Credit Card, DBS, and eNETS payment channels.

Key Skills: ASP.NET Core, C#, Angular, Microservices, AWS, Docker, Kubernetes, SQL Server, Git, CI/CD

Key Contributions

- Developed scalable microservices and REST APIs for payment processing, transaction lifecycle management, and reconciliation workflows.
- Integrated DBS and eNETS, workday cumulus payment gateways to support multiple secure payment channels.
- Built event-driven processing components using AWS SNS and SQS to improve reliability and system resilience, supporting thousands of users daily.
- Developed and deployed containerized services using Docker, Kubernetes, Amazon EKS, and ECS.
- Leveraged AWS services including Lambda, API Gateway, S3, RDS, Secrets Manager, and CloudWatch to build cloud-native applications.
- Reduced payment transaction processing latency by **30%** through microservice optimization.
- Participated in solution design, code reviews, testing, deployment automation, and production support activities.
- Collaborated with business stakeholders, architects, vendors, and cross-functional teams to deliver highly available payment services.

Client: Ministry of Culture, Community and Youth (MCCY), Singapore

Project: Charity Portal e-Services

2022 – 2024

Government digital platform enabling organizations to register and manage charitable entities through Singpass and Corppass authentication.

Key Skills: ASP.NET Core, Angular, SQL Server, AWS, REST APIs, Git, CI/CD

Key Contributions

- Developed end-to-end full-stack features using Angular and ASP.NET Core.
- Designed and implemented RESTful APIs supporting charity registration, application processing, and regulatory workflows.

- Integrated Singpass and Corppass authentication through CAMS integration for secure user onboarding and access control.
- Developed scalable backend services implementing complex business validation and workflow processing logic.
- Built reusable Angular components to improve maintainability and user experience.
- Optimized SQL Server queries, stored procedures, and database objects to enhance application performance significantly.
- Contributed to microservices architecture, API governance, and cloud migration to GCC.
- Utilized AWS services including Lambda, API Gateway, ECS, IAM, CloudWatch, and S3 for deployment and monitoring.
- Participated in Agile ceremonies, technical design discussions, testing, and production deployments.

Speridian Technologies, India

Systems Analyst / .NET Full Stack Developer

Dec 2021 – 2022

Client: H&R Block, USA

Project: Customer Identity & Access Management (CIAM)

Enterprise authentication and authorization platform supporting online tax filing applications and financial products.

Key Skills: ASP.NET Core, Angular 8, SQL Server, Microservices, PingOne, PingDirectory, xUnit, Moq

Key Contributions

- Developed and maintained secure authentication and authorization solutions using ASP.NET Core and Angular.
- Designed RESTful APIs supporting user authentication, authorization, and identity management workflows.
- Integrated PingOne and PingDirectory solutions to enable secure customer identity services.
- Developed microservices supporting customer registration, account management, and access control.
- Implemented unit and integration testing using xUnit and Moq to improve code quality and maintainability.
- Collaborated with product owners and business teams to analyze requirements and deliver enhancements.
- Participated in code reviews, sprint planning, retrospectives, and release activities.

Larsen & Toubro Infotech (LTI), India

Software Engineer

Aug 2019 – Nov 2021

Client: TAPCO Insurance, USA

Project: Insurance Underwriting vNext

Enterprise underwriting platform supporting Personal Liability, Commercial Property, Homeowners, and Dwelling insurance products.

Key Skills: C#, .NET Core 3.1, Angular 8, WPF, Entity Framework, SQL Server, RabbitMQ, WCF

Key Contributions

- Developed and maintained full-stack business applications using C#, .NET Core, Angular, and WPF.
- Designed and implemented underwriting modules supporting multiple insurance product lines.
- Enhanced legacy systems through modernization initiatives, UI improvements, and performance optimization.
- Built REST and SOAP services to support integrations with external business systems.
- Developed backend services using Entity Framework, SQL Server, and Windows Services.
- Implemented asynchronous messaging solutions using RabbitMQ.
- Conducted unit testing and integration testing to ensure application quality and stability.
- Mentored junior developers and contributed to technical discussions and solution design initiatives.
- Collaborated closely with business analysts, QA teams, and client stakeholders within Agile teams.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- AWS Developer Associate
- AgilePoint NX Certification Exam (AgilePoint Application Developer)

EDUCATION

Bachelor of Technology (B. Tech) 2019: B.S. Abdur Rahman Crescent Institute of Science and Technology Chennai, India.
